

Dear Chris,

8/17/83

Relet 11, all the books are listed in Post Mortem. I've not been able to write any others because of impaired health and other needs but I still hope to.

The first book is almost out of print. Oswald in New Orleans has been out of print for years but recently I obtained a few copies. So few that I'm not letting it be known generally that I have them because I want to reserve them for those who have serious interest.

The prices have not gone up but shipping has and I can't keep up with those increases. Before I send any copies overseas I check with the post office.

I, II and IV are \$6.60 postpaid in the US. The 1976 edition of Photo WW is \$9.25 pp in US, and Post Mortem and Frameup are \$11.40.

I can't think of any way I can help you follow up on the missing tissue.

However, I do disagree with your statement that it could confirm the single-bullet theory. I do not believe that anything can confirm that because there is so much evidence that it is impossible.

Best wishes,
